Objective

I am a Frontend Developer with over 3 years of experience, specializing in building and optimizing user interfaces (UI) for web applications. I am proficient in technologies such as HTML, CSS, JavaScript, and modern frameworks like React and Vue.js.

Additionally, I am skilled in version control tools like Git. I have a strong passion for improving user experience (UX) and constantly strive to optimize website performance for efficiency and responsiveness. With a problem-solving mindset and the ability to work both independently and as part of a team, I am eager to contribute to the development of high-quality web projects while continuously expanding my knowledge and skills in frontend development.

Education

AGILE ACADEMY

10/2021 - 11/2021

Certified Pragmatic Scrum

Completed a short-term course on Scrum at Agile Academy

UNIVERSITY OF TRANSPORT TECHNOLOGY

2017 - 2021

Information Systems

- Courses completed include Data Structures and Algorithms, Web Development, and Database Management.
- As the class monitor, I was entrusted with the role of team leader for classroom projects.
- Final year project: Development of a document management application with digital signature integration.
- GPA: 3.68/4.0

Work experience

SUNTECO JSC 11/2023 - Present

Middle Frontend Developer

In this project, we provided scalable cloud infrastructure services tailored to enterprise needs, offering containerized solutions, Kafka for event streaming, and virtual machine hosting. The goal was to create a robust and flexible environment for clients to run their applications efficiently in the cloud.

- Worked closely with the backend team to integrate cloud services (containers, Kafka, virtual machines, ...) into the user interface, ensuring seamless user interactions with the cloud infrastructure.
- Developed interactive dashboards and monitoring tools to display real-time data on cloud resource utilization and performance metrics, enabling clients to manage their virtual machines and containers effectively.
- Collaborated with the UX/UI design team to create an intuitive and responsive interface for managing cloud services, ensuring ease of use across both desktop and mobile platforms.

JMANGO360 LTD 09/2022 - 11/2023

Frontend Developer

This project focuses on developing a professional e-commerce website for businesses, providing online shopping features such as product management, shopping cart, payment, and delivery options. The platform helps businesses expand their online sales channels and improve customer shopping experience.

- Worked closely with the backend team to build the user interface for website features such as product pages, shopping cart, checkout, and user profile pages.
- Designed and implemented product pages, ensuring the display of detailed product information, images, pricing, promotions, and customer reviews.
- Optimized the user interface to ensure smooth performance across all devices, including mobile and desktop.
- Partnered with the product team to plan and implement new features that meet customer needs and market trends.

RIKKEISOFT CORPORATION

10/2021 - 08/2022

Frontend Developer

This project develops a matching software that connects hospitals, clinics with doctors, nurses, and healthcare staff, while also providing a management interface for hospitals. The software allows doctors and nurses to search for job opportunities in healthcare facilities, and hospitals and clinics can find suitable personnel.

- Developed a user-friendly interface for hospitals and clinics to manage job postings, monitor recruitment progress, and store personnel records effectively.
- Create a management interface for hospitals and clinics, allowing them to manage recruitment requests, track the recruitment progress, and store personnel records.

MISA JSC 06/2021 - 08/2021

Fullstack Developer Intern

- Gained hands-on experience in both frontend and backend development by working on a personal fullstack project.
- Learned frontend technologies (HTML, CSS, JavaScript, VueJS) to build dynamic user interfaces.
- Developed backend skills with technologies such as C#, .NET and SQL Server to manage server-side logic and APIs.
- Delivered a final presentation to a panel, showcasing the project, explaining technical decisions, and demonstrating the functionalities of the application.
