PROFILE

Fullstack developer with 5 years of experience and a strong frontend focus. I build React and Next.js products with rich editors, dashboards and fast, SEO-friendly pages, and I carry features across the stack when needed: APIs, Prisma schemas, email delivery and Laravel back offices. At NetSpace I have shipped 13 projects in 19 months, including Vietnam's national KOL portal.

EXPERIENCE

NetSpace

Apr 2025 – Present now

Fullstack Developer · Công ty CP Công nghệ & Truyền thông Không gian số, Hà Nội

- Shipped 13 projects to production in 19 months: news platforms, a national government portal, an event SaaS, e-commerce and corporate sites.
- Main developer of the post editor in AntCMS, the company's multi-tenant newsroom CMS.

NetEvent

Event management SaaS · Fullstack — event.netspace.vn

- Built the organizer flow in a Next.js and Prisma monorepo: event setup, ticket tiers and a registration form builder with field rules and live preview.
- Shipped on-site tools (QR and phone check-in; wheel, slot-machine and gift-box mini games) and the email pipeline: invitations, editable templates, per-organization SMTP.

AntCMS post editor

Newsroom CMS · Frontend · React in Laravel/Inertia

- Built the BlockNote editor with custom media, code, table and link-preview blocks, a Vietnamese slash menu and a mobile toolbar.
- Integrated AI tools (ANT Assistant chat, generated SEO fields and tags, live SEO score) and the editorial flow: scheduling, review returns, permissions, autosave.

Góc Nhìn Mới

News & social reading · Frontend — gocnhinmoi.com.vn

- Built article, eMagazine, photo and podcast experiences, the mega menu and search, and the 2026 desktop redesign.
- Added login, comments, follows, bookmarks and a reader post editor; handled technical SEO with Open Graph, schema.org and 301 redirects.

KOLs Portal

National government portal · Fullstack — kol.gov.vn

- Built the public portal for the Ministry of Culture, Sports and Tourism (rankings, declaration forms, violation reports, livestream certification) and a brand dashboard.
- Wrote back-office rules in Laravel and Filament: duplicate-profile detection on 4 criteria with a merge flow and daily scan, auto identity verification, Word import.

Also shipped: VietPress (news portal, technical SEO) · Thiên Khôi Education (LMS exams on web and Expo mobile) · BuddhaWorlds (temple map, digital library, 3 languages) · BuddhaZon (e-commerce storefront) · Thiên Khôi CDC and Star World Group (corporate sites).
